

## Managing your mental health while in self-isolation or quarantine

There are a number of ways to support your mental health during periods of self-isolation or quarantine.

- Remind yourself that this is a temporary period of isolation to slow the spread of the virus.
- Remember that your effort is helping others in the community avoid contracting the virus.
- Stay connected with friends, family and colleagues via email, social media, video conferencing or telephone.
- Engage in healthy activities that you enjoy and find relaxing.
- Keep regular sleep routines and eat healthy foods.
- Try to maintain physical activity.
- Establish routines as best possible and try to view this period as a new experience that can bring health benefits.
- For those working from home, try to maintain a healthy balance by allocating specific work hours, taking regular breaks and, if possible, establishing a dedicated workspace.
- Avoid news and social media if you find it distressing.
